POSTERS PRESENTATION GUIDELINES

Guidelines for production:

- The poster should have the following dimensions: 90x120cm vertical.
- The suggested outline (introduction, method, results, and conclusions) is recommended, but it's not mandatory to include all of them. You can also include the contact information of the author(s), social media profiles, and even a QR code to capture and download relevant information.
- It is recommended to include figures, images, tables, and diagrams to provide a better representation of the data.

Exhibition Guidelines:

- Remember to print the poster yourself and bring it with you to the conference venue.
- All posters will be displayed in the designated area at the conference venue. At the end of the conference, authors can collect their work. If they fail to do so, it will be disposed of by the organization without the possibility of retrieval.
- The main author must have completed their conference registration beforehand.
